Justification for Noncompetitive Procurement via Negotiations

Dead Creek is located in the towns of Sauget and Cahokia in St. Clair County, Illinois. During the past forty years Dead Creek received industrial wastes from a variety of industries. USEPA decided that an immediate site security action would be necessary to mitigate the threat to the public health and welfare of the local citizens from direct contact with the creek.

In July 1982 USEPA ~~sought~~ solicited proposals from six local fence contractors to install a chain link fence around the perimeter of Dead Creek between Queeny and Judith Lanes. USEPA received two proposals and the Granite City Fence Company was selected as low bidder. The contract ~~was~~ was awarded on August 9, 1982.

Mr. Michael C OToole, the On-Scene Coordinator visited the Dead Creek site on October 4, 1982. Mr. OToole discovered an 80 foot section along the southern ~~edge~~ edge of the quarry pond adjacent to Dead Creek ~~which~~ which was not fenced. This 80 foot section was not included in the existing ~~contract~~ contract's ~~to be~~ statement of work and will not be enclosed with a chain link fence. However in order to secure the entire ~~site~~ site this 80 foot section must be fenced. This effort would be a continuation of the existing contract

being performed by the Granite City fence Company.
~~Granite City is now installing fence at present~~
~~this is 80 feet section.~~ This addition
afford would also be a segment of an
existing center rail which was considered in
unjust situation.

Therefore, it is recommended that the existing
conditions be modified to allow Granite City
Fence Company to install this 80 foot section.
of chain link fence. He paid 80 per linear
foot and also be extended for one
additional four weeks.
